Appendix F	Proposed Trip Generation

1. Introduction

1.1 Overview

- 1.1.1 Hydrock Consultants Ltd has prepared this Transport Statement (TS) on behalf of Morgan Sindall Construction and Infrastructure Ltd in support a planning application for the proposed mixed-use development at Harbourside, Neath and Port Talbot.
- 1.1.2 The proposed development is a mixed-use employment facility that will comprise office space, laboratories, research and production area storage. The new facility will be known as the South Wales Industrial Transition from Carbon Hub (SWITCH) with Swansea University as the key stakeholder.
- 1.1.3 The development site is on land allocated for strategic regeneration under Policy SRA 2 of the Neath Port Talbot County Borough Council Local Development Plan (LDP) (2011-2026), with 7ha of land allocated for employment development.
- 1.1.4 A Travel Plan (TP) has been prepared in support of the development of the site. The TP identifies measures and initiatives to encourage travel to and from the site by sustainable modes of travel, and is submitted as a separate document. The TP is submitted as a separate document (ref: 26279-HYD-XX-XX-RP-TP-6001.)

1.2 Scope of Transport Statement

- 1.2.1 This TS sets out the proposed development, access arrangements, the implementation programme, and considers the transport impacts of the proposed development. It demonstrates that the proposed development is acceptable in terms of transportation, highway safety and access matters.
- 1.2.2 As a broad overview the TS is structured in the following manner:
- » Description of the location of the site as well as a review of the existing conditions of the surrounding local highway network and highway safety.
 - » Site accessibility by all modes
 - » Road safety analysis within the vicinity
 - » Development proposals, including GFA, potential number of staff and a description of access by all modes
 - » Summarise proposed parking (car and cycle) and justifying provision in accordance with standards and potential demand
 - » Details of servicing arrangements and access for emergency vehicles in including undertaking swept path analysis of the site layout for appropriate vehicles
 - » Forecast vehicle trip generation associated with proposals using applicable TRICS sites
 - » Summary and conclusions.

2. Existing conditions

2.1 Site location and description

- 2.1.1 The development site lies in the Harbourside area of Port Talbot which is a brownfield site formally used for industry. North of the site is the Port Talbot Parkway Station located 200m away and the town centre, 400m from the site. TATA Steel Works is 1.4km to the east and the Port Talbot Docks is 150m to the south. The site is located between Harbour Way (A4241) to the south and west, Oakwood Road to the east and Cramic Way to the north.
- 2.1.2 The dockyard was historically part of the Port Talbot Steel Works and later a Chemical Works with all the buildings being demolished between 1997 and 2007. The construction of an access road into the site and remediation works to facilitate the regeneration of the land have been undertaken under planning application reference P2020/0294.
- 2.1.3 The location of the site in its local context is shown in Figure 2.1.

Figure 2.1: Location of the site in its local context

2.2 Local highway network

Overview

- 2.2.1 Access to the site is served by the local road network with local connection to the Strategic Road Network (SRN). Below is a brief summary of the highway network within the immediate vicinity of the site.

Harbour Way A4241

- 2.2.2 Harbour Way is a dual carriageway road that lies directly south and west of the site. Harbour Way is subject to a 40mph speed limit within the vicinity of the site. Directly south of the site Harbour Way has a footway, measuring 3.2m in width adjacent to the north of the carriageway. Harbour Way meets the North Bank Road roundabout and continues north along the western boundary of the site.

Oakwood Road

- 2.2.3 Oakwood Road is a single carriageway road that connects Harbour Way to Cramic Way and Port Talbot Parkway Railway Station. Oakwood Road also provides access to the development site via a recently built priority junction arrangement. The road is subject to a 40mph speed limit with footways and street lighting provided on both sides of the carriageway.

Cramic Way

- 2.2.4 Cramic Way is a single carriageway road which is subject to a 40mph speed limit and it leads from Oakwood Road to Port Talbot Parkway Railway Station and industrial units. Street lighting and 2.0m footways are provided adjacent to both sides of the carriageway.

2.3 Strategic Road Network (SRN)

M4

- 2.3.1 The M4 is some 1.5km to the north of the site which forms part of the SRN between Swansea and London.

2.4 Highway safety

- 2.4.1 The CrashMap PIA data website has been reviewed for the most recent 5-year period between 1st January 2018 to 31st December 2022. The study area includes Oakwood Road and Harbour way within the vicinity of the site as set out at Figure 2.2.
- 2.4.2 A review of the available PIA data indicates that there has been a total of three accidents recorded within the study area during the five-year period.

Figure 2.2: Personal injury accident data study area

- 2.4.3 The PIA data is reviewed to establish if the highway may be a causal factor in PIA events. It is unlikely that a single incident will lead to a conclusion that highway design resulted in the incident. Therefore, the review focuses on patterns and clusters of accidents.
- 2.4.4 One serious PIA and two slight accidents were recorded within the study area during the most recent five-year period. The PIAs recorded are summarised as follows:
- » **Serious:** Recorded on Harbour Way. Involved a vehicle proceeding normally along the carriageway colliding with a pedestrian (the causality) in the carriageway not at an official crossing.
 - » **Slight:** Recorded on Harbour Way roundabout. Involved one motorcycle and one causality (the driver). The vehicle came off the road on the left-hand bend.
 - » **Slight:** Recorded on Cramic Way. Involved two vehicles and two causalities. One vehicle moved off and the other vehicle was parked in the carriageway resulting in a collision.
- 2.4.5 The PIAs that have occurred do not indicate a specific pattern or issue with the geometry of the existing road layout and would not be exacerbated by the development proposals.
- 2.4.6 CrashMap outlines are provided at Appendix A.
- ## 2.5 Background planning context
- 2.5.1 An application (P2020/0294) was submitted for the regeneration of economic growth of Harbourside Port Talbot. The application was submitted in April 2020 by Neath Port Talbot County Borough Council and permission was granted on 15 April 2020.

- 2.5.2 The scheme involves the remediation of existing land to remove the contamination, the construction of a new road infrastructure, removal of voids, basements and foundations remaining on the site from the historic use and flood mitigation works.
- 2.5.3 The proposals were to deliver a road to connect Oakwood Road and Harbourside Road as shown in Figure 2.3. The road was built to serve the new business development sites which will result in the creation of additional employment opportunities for the surrounding community.

Figure 2.3: P2020/0294 road layout

- 2.5.4 Supporting the application there was: Ground Investigation Report; Flood Consequences Assessment and Mitigation Report; Scalable plans showing the proposed works including highway alignment, drainage, lighting landscaping; and Ecological Assessment.
- 2.5.5 The proposals did not include any traffic generation assessment.
- 2.5.6 Following on from P2020/0294 there have been a number of additional applications discharging specific conditions of the P2020/0294 permission.

3. Site Accessibility

- 3.1.1 This chapter of the TS will set out the connectivity of the site to the surrounding area by sustainable modes of travel.
- #### **3.2 Existing local amenities**
- 3.2.1 There are a number of publications which suggest guidance for appropriate walking and cycling distances to facilities. For reference, these have been summarised as follows.
- 3.2.2 Although now superseded by CD143, TA91/05 provides useful guidance on likely walking and cycling distances. Paragraph 2.3 of TA91/05 Provision for Non-Motorised Users states that 'Walking issued to access a wide variety of destinations including educational facilities, shops, and places of work, normally within a range of up to 2 miles' (3.2km). Paragraph 2.2 of TA91/05 states that 2 miles is 'a distance that could easily be walked by the majority of people' and (at paragraph 2.3) that 'Walking and rambling can also be undertaken as a leisure activity, often over longer distances'. In relation to shorter trips in particular, the CIHT publication Planning for Walking (section 2.1) states that across Britain about '80% of journeys shorter than 1 mile are made wholly on foot'.
- 3.2.3 With regard to cycling, TA91/05 goes on to state (in paragraph 2.11) that 'Cycling is used for accessing a variety of different destinations, including educational facilities, shops and places of work, up to a range of around 5 miles. Cycling is also undertaken as a leisure activity, often over much longer distances.' At paragraph 2.9, TA91/05 states that 5 miles (8km) is a distance 'that could easily be cycled by the majority of people'.
- 3.2.4 This is consistent with the statement in LTN1/20 Cycle Infrastructure Design (in paragraph 2.2.2) that 'Two out of every three personal trips are less than five miles in length – an achievable distance to cycle for most people'.
- 3.2.5 Welsh Government - Active Travel (Wales) Act 2013: Within the Active Travel Act Design Guidance (ATADG) it is stated within paragraph 4.1.4 that "walking as a mode of travel predominates for journeys of less than two miles whilst cycling is more convenient for longer journeys, typically of up to five miles for regular journeys". This equates to walking distances of up to 3.2km and cycling distances of up to 8km.
- 3.2.6 As such, it is considered that suitable walking distances could be up to 3.2km. This equates to around a 40-minute walk travelling at 3mph (4.8kph). It has been assumed that journeys of up to 8km are within an acceptable cycling distance. A cycling journey of 8km would equate to approximately a 25-minute trip.
- 3.2.7 Distances to some key facilities which may be required by staff on a daily basis are highlighted in Table 3.1.

Table 3.1: Local amenities and facilities

Type	Name	Distance (metres)	Walking Time (mins)	Cycling Time (mins)
Train station	Port Talbot Parkway Railway Station	200	3	1
Bus stop	Port Talbot Bus Station	720	10	3
Shopping	Mandie's Breakfast Van	220	3	1
	Aberfan Shopping Centre	1000	12	5
	Tesco Superstore	1500	15	7

- 3.2.8 The local facilities and amenities demonstrate that the site is well served with regard to access to retail and public transport.

3.3 Pedestrian connectivity and accessibility

- 3.3.1 The site benefits from pedestrian footways within the vicinity of the site. A pedestrian footway is provided along Oakwood Road and ranges between 2.0-2.5m in width. This footway connects north to the railway station along Cramic Way or south to the wider industrial estate along Harbour Way. There is a controlled zebra crossing point along Cramic Way, immediately adjacent to the Port Talbot Parkway Railway Station for access to the car park.
- 3.3.2 To access residential areas on the opposite side of the railway line, pedestrians can use the Port Talbot Parkway railway bridge to cross the railway line.
- 3.3.3 There is a shared use cycleway/footway which starts from Harbourside car park to the A4241 roundabout to provide easier access to the town centre and bus station. This footpath will be accessed from the internal access road of the site along to Harbourside Road.

3.4 Cycle connectivity and accessibility

- 3.4.1 The site is in close proximity to Swansea Bay Cycle Network Active Travel cycle red route is located along Harbour Way and the shared use footway from Harbourside car park to the A4241. This cycle route provides access to cycle routes around Port Talbot to residential areas north of the railway line and along Port Talbot beach at Swansea Bay.
- 3.4.2 A section of the National Cycle Network (NCN) 4 from London to Fishguard goes along A4241 Harbour Way and provides routes west to Swansea and east to Margam County Park. The NCN 887 provides a route between Port Talbot and Afan Forest Park. A cycle map of routes in the vicinity of the site is shown in Figure 3.1.

Figure 3.1: Neath Port Talbot Cycling Map

- 3.4.3 A full map of cycling in Neath Port Talbot is attached at Appendix B.
- 3.4.4 The site is well situated to benefit from access to existing cycling routes and cycling would offer an attractive and realistic choice of travel mode for staff of the site.

3.5 Accessibility by public transport

Bus

- 3.5.1 The closest bus stop to the site is Port Talbot Parkway which is approximately 300m away and is accessed via the railway station building and across the railway line. This stop is served by the buses X1, X3, 87 and T1C.
- 3.5.2 There is a high frequency of local and national bus services that serve Port Talbot Bus Station which is located approximately 720m west of the site and a brief summary of the local bus services is provided in Table 3.2 and attached at Appendix C.

Table 3.2: Port Talbot bus station timetable

Service	Bus Stop	Route	Average Frequency of Services (minutes)			Saturday	Sunday		
			Mon-Fri						
			AM Peak	PM Peak	First / Last				
X1	Port Talbot Bus Station	Swansea – Port Talbot - Bridgend	30	30	0705/1834	30	60		
X3	Port Talbot Bus Station	Port Talbot - Maesteg	60	60	0757/1909	60	-		
9	Port Talbot Bus Station	Port Talbot - Sandfields	60	60	0815/1615	-	-		
66	Port Talbot Bus Station	Port Talbot – Goytre	60	60	0922/1722	60	-		
81	Port Talbot Bus Station	Port Talbot – Brynbryddan	60	60	0719/1827	60	-		
84	Port Talbot Bus Station	Swansea Bus Station – Port Talbot Bus Station	120	120	0630/1805	120	-		
87	Port Talbot Bus Station	Margam – Neath Bus Station	20	20	0848/1906	30	60		
T1C	Port Talbot Bus Station	Aberystwyth – Cardiff	1 service		1247	1247	1247		

- 3.5.3 National Express services serve the bus station with destinations including London, Birmingham, London Gatwick and Heathrow, Manchester and Nottingham.

Rail services

- 3.5.4 Port Talbot Parkway Railway Station is located 200m walking/cycling distance and is easily accessible on foot (3-minute walk) or bicycle (2-minute cycle) from the site. Cycle stands are located in the station car park which facilitates access to and from the site via rail and cycle and the station also benefits from CCTV to improve security.
- 3.5.5 Port Talbot Parkway railway station offers national, regional and local services. A brief summary of the rail services available from Port Talbot Parkway is provided in Table 3.3.

Table 3.3: Port Talbot Rail services

Destination	Operator	Journey Time (mins)	First Train	Last Train
Swansea	Transport for Wales	31	06:21	02:07
Cardiff Central	Transport for Wales	46	04:05	22:57
Manchester Piccadilly	Transport for Wales	300	04:05	20:20
Milford Haven	Transport for Wales	145	06:21	20:19
London Paddington	Great Western Railway	150	04:05	20:42
Carmarthen	Great Western Railway	80	06:21	00:25

3.6 Accessibility summary

- 3.6.1 The site is situated in a sustainable location. It is surrounded by well-established and high-quality walking and cycling routes which already accommodate significant levels of pedestrian and cyclist movements.
- 3.6.2 There are frequent bus and rail services within walking distance of the site which provide access to a variety of key local, regional and national destinations. These provide an alternative to travelling to the site by car.
- 3.6.3 The range and choice of travel options within the vicinity of the site therefore offer a realistic and alternative to the car for travel to and from the site. The accessible location will therefore encourage and promote sustainable travel behaviour and would attract staff who would prefer to travel by modes other than the private car.

4. Development proposals

4.1 Overview and layout

- 4.1.1 The proposed development is a mixed-use employment facility that will comprise of 3688 sqm of B1 office space, laboratories, research, and production area storage. The new facility will be known as the South Wales Industrial Transition from Carbon Hub (SWITCH) with Swansea University as the key stakeholder. It is part of The Harbourside Strategic Employment Site and is an area of 3.0 ha within the Harbourside development area.
- 4.1.2 The site layout plan is provided at Figure 4.1 and attached at Appendix D.

Figure 4.1: Site layout plan

4.2 Vehicle access

- 4.2.1 As part of the development proposals the recently consented and constructed access road will be closed. It is proposed that the development site will gain access from the existing priority junction with Oakwood Road. This access will be for staff, visitors and refuse vehicles.
- 4.2.2 A delivery access will be located to the west of the site and accessed via Harbourside Road for delivery vehicles and refuse vehicles.

- 4.2.3 Site access drawings are included at Appendix E.

4.3 Pedestrian access

- 4.3.1 There is a high-quality pedestrian infrastructure within the vicinity of the site which is well maintained, lit and benefits from good natural surveillance.
- 4.3.2 Pedestrian access into the site would be from Oakwood Road via a continuation of the existing footways which range from 2.7m-3.0m. Pedestrian infrastructure would be provided within the site creating a continuous link between Oakwood Road and the building entrance.
- 4.3.3 At Harbour Way and Oakwood Road roundabout there are dropped kerbs and a pedestrian refuge island in place. The footways continue north along Cramic Way via Oakwood Road to Port Talbot Parkway Railway Station. A zebra crossing is in place directly adjacent to the station from the Harbourside car park.
- 4.3.4 There is a pedestrian footpath which starts from Harbourside car park to the A4241 roundabout to provide easier access to the town centre and bus station. This footpath will be accessed from the internal access road of the site along to Harbourside Road.

4.4 Servicing access

- 4.4.1 Servicing arrangements will be via the proposed vehicular access at the main access to the bin store located to the north of the site and via the delivery access to the west of the site.

4.5 Parking

Parking policy

- 4.5.1 The parking standards for Neath Port Talbot are set out in the Neath Port Talbot CBC Local Development Plan (LDP) (2011-2026) Parking Standards, Supplementary Planning Guidance (SPG). A zonal approach to the standards is employed within the SPG with the site falling under Zone 4.
- 4.5.2 The parking standards for B1 uses are set out at Table 4.1.

Table 4.1: Use class B1 Zones 4-6 parking standards

Development	Requirement	Development	Requirement
Offices (<1000m ²)	1 space per 20m ²	Offices (>1000m ²)	1 space per 20m ²

- 4.5.3 Based on the proposed GFA of 3688 sqm, in order to comply with the NPT parking standards, a total of 184 car parking spaces would be required at the development.
- 4.5.4 A 'reduction in parking requirement' calculation is set out in the Parking Standards SPG which allows a reduced level of parking provision, dependant on the number of sustainability points achievable by a development.
- 4.5.5 It has been calculated that the proposed development could achieve a sustainability score of seven and therefore a 20% reduction can be applied to the car parking requirement as per the 'reductions in parking requirement' table within the SPG.

- 4.5.6 Once the 20% reduction factor is applied to the parking requirement, the policy compliant level of car parking provision would be 147 car parking spaces.
- 4.5.7 NPT CBC parking standards require that 5% of the overall parking capacity is provided as dedicated disabled parking bays.
- 4.5.8 The parking policy set out above reflects the requirements of an office. The proposals for a data centre result in a lower demand for parking for a given GFA as a large proportion of the building is taken up by servers.

Proposed car parking

- 4.5.9 Given the specific use of a data centre and the resulting lower demand for parking. The proposed parking provision has been based on the operators experience of the required staffing levels. Therefore, the bespoke approach for the development proposals is to provide a total of 93 car parking spaces within the site.
- 4.5.10 Based on 93 car parking spaces, five disabled parking spaces will be provided in line with NPT CBC parking standards. In addition, nine parking bays will be allocated as Electric Vehicle (EV) charging.
- 4.5.11 This is an appropriate level of car parking based on the use of the development.

Proposed cycle parking

- 4.5.12 The NPT CBC cycle parking standards are set out within the Parking Standards SPG. The standards relating to B1 offices are set out at Table 4.2.

Table 4.2: B1 use cycle parking provision

Development	Requirement – Long Stay	Requirement – Short Stay
Offices	1 stand per 200m ²	1 stand per 1000m ²

- 4.5.13 Based on the current proposed GFA of 3688sqm there would be a requirement for the provision of 18 long stay cycle parking spaces and four short stay spaces.

5. Trip generation

5.1 Introduction

5.1.1 This section sets out the forecast trip generation of the proposed development.

5.2 Existing traffic generation

5.2.1 Historically the site operated as part of TATA steel works and later chemical works, an existing industrial use and place of employment. The existing floor space is unknown however, it is likely it would have been greater in scale to that of the development proposals and thus generated a higher number of vehicle trips both operationally and by staff.

5.3 Proposed B1 trip generation

- 5.3.1 The Trip Rate Information Computer System (TRICS 2023 v 7.10.2) online database has been analysed for sites with similar characteristics to the mixed-use development. B1 offices in edge of town locations within Wales, Scotland and England (excluding Greater London) have been reviewed.
- 5.3.2 The proposed vehicle trip rates and resultant trip generation based upon the proposed B1 floor space, totalling 3688sqm, are summarised in Table 5.1. A copy of the TRICS report is included at Appendix F.

Table 5.1: Proposed B1 trip rates and trip generation (3,688.1 sqm)

	Trip Rates (per 100 sqm)			Trip Generation (vehicles)		
	Arrivals	Departures	Two-way	Arrivals	Departures	Two-way
AM Peak (08:00-09:00)	1.021	0.169	1.19	38	6	44
PM Peak (17:00-18:00)	0.103	0.73	0.833	4	27	31
Daily	3.381	3.345	6.726	125	123	248

- 5.3.3 The development proposals would result in an additional 44 two-way movements in the morning peak hour and 31 two-way movements in the evening peak hour. It is not considered that these additional people movements would have a material impact on the operation of the existing public transport, pedestrian or cycle infrastructure.

5.4 Parking accumulation

- 5.4.1 A parking accumulation has been undertaken for the scenario whereby the proposed development has an increase in traffic. This parking accumulation calculation has been undertaken using the agreed TRICS trip rates for the B1 office use. The car parking accumulation for weekday scenarios are set out in Table 5.2.

Table 5.2: B1 office car parking accumulation

Time	Arrivals	Departures	Difference	Accumulation	Accumulation +10%
00:00-01:00	0	0	0	0	0
01:00-02:00	0	0	0	0	0
03:00-04:00	0	0	0	0	0
04:00-05:00	0	0	0	0	0
05:00-06:00	0	0	0	0	0
06:00-07:00	0	0	0	0	0
07:00-08:00	12	2	10	10	11
08:00-09:00	41	7	34	44	48
09:00-10:00	21	9	12	56	62
10:00-11:00	10	8	2	58	64
11:00-12:00	7	7	0	58	64
12:00-13:00	9	12	-3	55	61
13:00-14:00	11	11	0	55	61
14:00-15:00	7	9	-2	53	58
15:00-16:00	6	11	-5	48	53
16:00-17:00	6	17	-11	37	41
17:00-18:00	4	29	-25	12	13
18:00-19:00	1	9	-8	4	4
19:00-20:00	0	0	0	4	4
20:00-21:00	0	2	-2	2	2
21:00-22:00	0	0	0	2	2
22:00-23:00	0	0	0	2	2
23:00-00:00	0	0	0	2	2
Total	135	133	2	502	552

5.4.2 Table 5.2 sets out the accumulation for the B1 office use on the site. It can be seen that the maximum car parking demand would require 29 car parking spaces during the hours of 17:00-18:00 (the evening network peak). A total of 84 car parking spaces are proposed on the site. This confirms that the level of provision can meet the likely operational demand based on the accepted TRICS analysis.

- 5.4.3 To offer a robust scenario a 10% uplift has been applied. This demonstrates that a total of 32 spaces would be required. This can be suitably accommodated within the proposed car park to meet the operational requirements of the office site.

5.5 Vehicle distribution and assignment

- 5.5.1 The percentage distribution of vehicles across the network will be based on 2011 Census data contained in QS701EW - location of usual residence and place of work by method of travel to work. The driving a car or van dataset will be selected as the method of travel.
- 5.5.2 The 2011 Census data is considered appropriate for use in distribution vehicle traffic onto the network in the peak hours from this site.
- 5.5.3 To capture an appropriate vehicular distribution the Neath Port Talbot 019 Middle Layer Super Output Area (MSOA) will be used. This area includes the site and is shown below in Figure 5.1.

Figure 5.1: Neath Port Talbot 019 Super Output Area (Source: Nomis)

- 5.5.4 The most appropriate routes will be identified from the site and would be based on distances and times between the site and destination, with the same distribution percentages used in the AM and PM peaks.
- 5.5.5 The distribution percentages have been applied to the forecast trips generated from the site access at Oakwood Road to assess the traffic impact of the site at local junctions and is provided at Table 5.3.

Table 5.3: Site Access Trip Distribution Percentages

Site Access	Arrivals
A4241 Harbour Way West	65%
A4241 Harbour Way South	35%
Total	100%

- 5.5.6 On review the trip distribution there is no significant traffic impact of the site at the local junctions.

6. Summary and conclusions

6.1 Summary

- 6.1.1 This Transport Statement (TS) has been prepared by Hydrock on behalf of Morgan Sindall Construction and Infrastructure Ltd in order to support a planning application for the proposed mixed-use development at Harbourside, Neath and Port Talbot.
- 6.1.2 This report has been prepared to provide the necessary information for the Local Highway and Planning Authorities to consider the merits of the development proposals in terms of its location, highway safety and the impact of the development traffic on the local highway network.

6.2 Conclusions

- 6.2.1 The site is situated in the Harbourside area and is part of the Neath Port Talbot Local Development Plan (2016-2026).
- 6.2.2 The public transport options within the vicinity of the site offer a realistic and alternative to the car for travel to and from the site. The accessible location will therefore encourage and promote sustainable travel behaviour and would attract staff who would prefer to travel by modes other than the private car.
- 6.2.3 In reviewing the details of the accident data, it is considered that there are no safety issues in the vicinity of the site that would be exacerbated by the proposals.
- 6.2.4 Based on the information contained within this TS it is considered that the development will not have a material impact on the operation or safety of the surrounding highway network.
- 6.2.5 It is therefore considered that there are no reasons relating to transport or highways for objecting to the application.

Appendix A Road Safety Data

**Validated Data**

Crash Date: Tuesday, April 11, 2017 **Time of Crash:** 2:59:00 PM **Crash Reference:** 2017621700595

Highest Injury Severity: Slight **Road Number:** U0 **Number of Casualties:** 1

Highway Authority: Neath Port Talbot **Number of Vehicles:** 2

Local Authority: Neath Port Talbot County Borough **OS Grid Reference:** 276662 189626

Weather Description: Fine without high winds

Road Surface Description: Dry

Speed Limit: 30

Light Conditions: Daylight: regardless of presence of streetlights

Carriageway Hazards: None

Junction Detail: Other junction

Junction Pedestrian Crossing: No physical crossing facility within 50 metres

Road Type: Single carriageway

Junction Control: Give way or uncontrolled
