

Construction Design and Management Regulations
 Design risk assessments are carried out throughout the design stages of the project in accordance with company procedures and methods. They identify possible areas of risk from the application of design and the use of the construction and materials and the associated risks of failure or collapse. The design is based on the most realistic and conservative design of materials, methods and construction. The design is based on the current Construction Design and Management Regulations 2015 and all applicable health and safety legislation in force at the time of writing.

Disclaimer: The information contained within this drawing is based on a survey of the site conducted by the main contractor appointed to carry out the works. Lawray Architects cannot be held responsible for the accuracy of the survey information. All works, structures, elements and materials have been inspected for the 2D and 3D information supplied. The Main Contractor must verify all works, structures, elements and materials prior to any works. The Main Contractor must inform the Design Team of any discrepancies between their field checks and the Design Team's survey.

Legend:

- Denotes new cable route
- Denotes site boundary
- 1 meter easement required each side of cable
