

Sustainability Report

Project name	SWITCH		
Design note title	Sustainability Report		
Document reference	26279-HYD-XX-XX-RP-TP-1001		
Author	Alice Reid		
Revision	P03		
Date	26 June 2024	Approved	✓

1. Introduction

1.1 Overview

- 1.1.1 Hydrock Consultants Ltd has prepared this Sustainability Report on behalf of Morgan Sindall Construction and Infrastructure Ltd in support a planning application for the proposed mixed-use development at Harbourside, Neath and Port Talbot.
- 1.1.2 The proposed development is a mixed-use employment facility that will comprise office space, laboratories, research and production area storage. The new facility will be known as the South Wales Industrial Transition from Carbon Hub (SWITCH) with Swansea University as the key stakeholder.
- 1.1.3 The development site is located on land allocated for strategic regeneration under Policy SRA 2 of the Neath Port Talbot County Borough Council Local Development Plan (LDP) (2011-2026), with 7ha of land allocated for employment development.
- 1.1.4 A Transport Statement (TS) and Travel Plan (TP) have been prepared in support of the development of the site. The TS and TP has been submitted as a separate document (ref: 26279-HYD-XX-XX-RP-TP-4001 and 26279-HYD-XX-XX-RP-TP-6001 respectively).
- 1.1.5 The site location is shown in Figure 1.1.

Figure 1.1: Site location

1.2 Purpose of report

- 1.2.1 This report has been produced based on the highway comments received from Neath Port Talbot County Council on 9th April 2024.
- 1.2.2 This Sustainability Report will address point 6 of the highway comments, which states:

6. Due to the nature of this development, a robust sustainability report will be required to evidence the reduced level of car parking provision to enable the authority to agree to base the parking demands on the amount of staff needed to facilitate the operational use and visitors to the site. We need to ensure that the agreed parking spaces for this particular development are specific only to this proposal and should the use class change, or additional parking demands arise, then a revised parking assessment will be necessary.

Parking provision on the site should include Electric Vehicle charging at a rate of 10%, disabled spaces (3.6m x 4.8m minimum) at a rate of 5% along with the proposed car sharing spaces. All car parking spaces inclusive of specific uses, should be clearly annotated to the correct dimensions on any future submissions.

1.3 Scope of sustainability report

- 1.3.1 Following this introductory section, the Sustainability Report is structured as follows:

- » Section 2: Sets out the accessibility and connectivity of the site including, the existing local amenities, pedestrian, cycle and public transport connectivity and accessibility;
- » Section 2.5.7: Highlights the proposed car and cycle parking provision, including the EV charging facilities;
- » Section 3: Presents the existing census travel to work data and likely vehicle distribution;
- » Section 4: Provides a range of Active Travel measures which will be implemented as part of the proposed development

2. Site accessibility

2.1.1 This chapter of the Sustainability Report will set out the connectivity of the site to the surrounding area by sustainable modes of travel.

2.2 Existing local amenities

2.2.1 The Chartered Institution of Highways and Transportation (CIHT) guidelines 'Providing for Journeys on Foot' indicates that the desirable walking distance for commuting and school journeys is 500m, the acceptable walking distance is 1km and 2km is the preferred maximum. The CIHT guidelines indicate that the desirable walking distance for 'Elsewhere', including local amenities, is 400m, the acceptable walking distance is 800m and 1.2km is the preferred maximum.

2.2.2 This is consistent with the statement in LTN1/20 Cycle Infrastructure Design (in paragraph 2.2.2) that 'Two out of every three personal trips are less than five miles in length'.

2.2.3 Welsh Government - Active Travel (Wales) Act Guidance 2013: stated within paragraph 4.1.4 that "walking as a mode of travel predominates for journeys of less than two miles whilst cycling is more convenient for longer journeys, typically of up to five miles for regular journeys". This equates to walking distances of up to 3.2km and cycling distances of up to 8km.

2.2.4 As such, it is considered that suitable walking distances could be up to 3.2km. This equates to around a 40-minute walk travelling at 3mph (4.8kph). It has been assumed that journeys of up to 8km are within an acceptable cycling distance. A cycling journey of 8km would equate to approximately a 25-minute trip.

2.2.5 Distances to some key facilities which may be required by staff on a daily basis are highlighted in Table 2.1.

Table 2.1: Local amenities and facilities

Type	Name	Distance (metres)	Walking Time (mins)	Cycling Time (mins)
Train station	Port Talbot Parkway Railway Station	200	3	1
Bus stop	Port Talbot Bus Station	250	3	1
Shopping	Mandie's Breakfast Van	220	3	1
	Talbot Road inc. Spar / Fast Food	350	4	2
	Port Talbot Town Centre and primary shopping street	400	5	2
	Aberfan Shopping Centre	1000	12	5
	Tesco Superstore	1500	15	7

2.2.6 It can be seen from the table above that there are a range of local facilities and amenities within walking distance of the development site, including a range of public transport services and retail facilities. This demonstrate that the site is well served with regard to a range of services that will benefit staff of the proposed development.

2.3 Pedestrian connectivity and accessibility

2.3.1 The site benefits from a good provision of pedestrian footways within the vicinity of the site. A pedestrian footway is provided along Oakwood Road and ranges between 2.0-2.5m in width. This footway provides connections to Port Talbot Parkway Railway Station to the north of the site, accessed via Cramic Way, and to the wider industrial estate to the south of the site, along Harbour Way.

2.3.2 A controlled zebra crossing point is provided along Cramic Way, which connects the southern side of the footway with Port Talbot Parkway Railway Station to the north.

2.3.3 There will be a direct connection northward to the train station and this is shown on the proposed site layout.

2.3.4 To access residential areas on the northern side of the railway line, pedestrians can use the Port Talbot Parkway railway bridge to cross the railway line.

2.3.5 There is a shared use cycleway/footway which starts from Harbourside car park to the A4241 roundabout and provides access to Port Talbot town centre and bus station. This cycleway/footway will be accessed from the internal access road within the site along to Harbourside Road.

2.4 Cycle connectivity and accessibility

2.4.1 The site is in close proximity to Swansea Bay Cycle Network Active Travel Cycle Red Route which is located along Harbour Way and accessed via the shared footway from Harbourside car park to the A4241. This cycle route provides access to cycle routes

around Port Talbot, including residential areas north of the railway line and along Port Talbot beach at Swansea Bay.

2.4.2 National Cycle Network (NCN) 4 is a long-distance cycle route providing connections from London (to the east) to Fishguard (to the west). NCN 4 runs along A4241 Harbour Way to the south of the site, and provides connections to Swansea (to the west) and Margam County Park (to the east). NCN 887 is also located within close proximity of the site and provides a connection between Port Talbot and Afan Forest Park. A cycle map of routes in the vicinity of the site is shown in Figure 2.1.

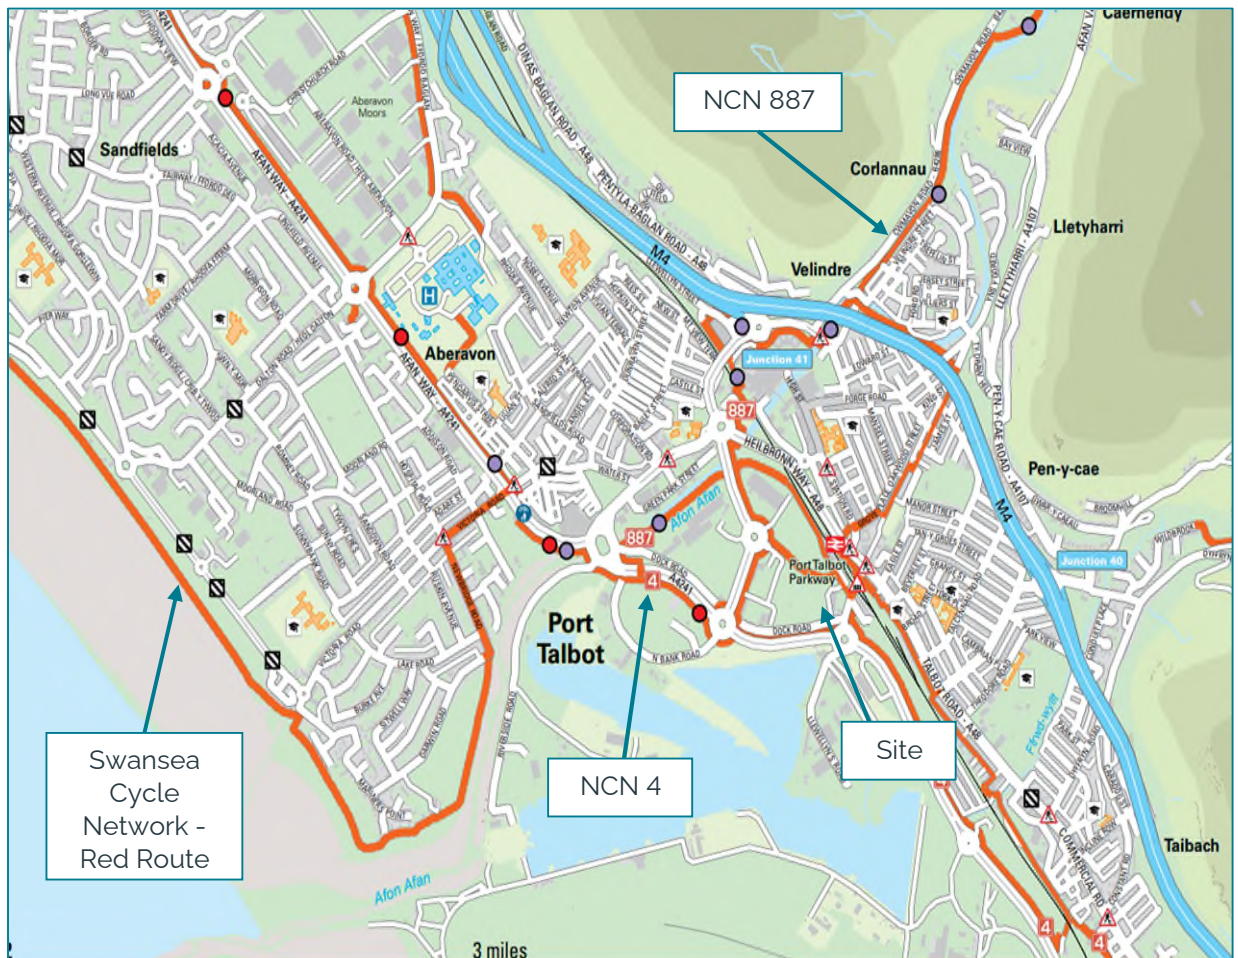

Figure 2.1: Neath Port Talbot Cycling Map

2.4.3 A full map of cycling in Neath Port Talbot is attached at Appendix A.

2.4.4 The site is well situated to benefit from access to existing cycling routes and cycling would offer an attractive and realistic choice of travel mode for staff of the site.

2.5 Accessibility by public transport

Bus

2.5.1 The closest bus stop to the site is Port Talbot Parkway, located approximately 300m to the north. The station is accessed via the railway bridge over across the railway line. This station is served by a range of bus services, including X1, X3, 87 and T1C.

2.5.2 There is a high frequency of local and national bus services that serve Port Talbot Bus Station which is located approximately 720m west of the site. A brief summary of the local bus services is provided in Table 2.2 below and attached in Appendix B.

Table 2.2: Port Talbot bus station timetable

Service	Bus Stop	Route	Average Frequency of Services (per hour)				
			Mon-Fri			Saturday	Sunday
			AM Peak	PM Peak	First / Last		
X1	Port Talbot Bus Station	Swansea – Port Talbot - Bridgend	2	2	0705/1834	2	1
X3	Port Talbot Bus Station	Port Talbot - Maesteg	1	1	0757/1909	1	-
9	Port Talbot Bus Station	Port Talbot - Sandfields	1	1	0815/1615	-	-
66	Port Talbot Bus Station	Port Talbot – Goytre	1	1	0922/1722	1	-
81	Port Talbot Bus Station	Port Talbot – Brynbryddan	1	1	0719/1827	1	-
84	Port Talbot Bus Station	Swansea Bus Station – Port Talbot Bus Station	One every other hour	One every other hour	0630/1805	One every other hour	-
87	Port Talbot Bus Station	Margam – Neath Bus Station	3	3	0848/1906	2	1
T1C	Port Talbot Bus Station	Aberystwyth – Cardiff	One service		1247	-	-

2.5.3 National Express services serve the bus station with destinations including London, Birmingham, London Gatwick and Heathrow, Manchester and Nottingham.

2.5.4 More locally, this bus station provides connections to Port Talbot, Swansea, Neath, Margam, Bridgend and Cardiff.

Rail services

2.5.5 Port Talbot Parkway Railway Station is located 200m walking/cycling distance from the site and is easily accessible on foot (3-minute walk) or bicycle (2-minute cycle). Safe and secure cycle stands are located in the station car park, which are accessed via the zebra crossing on Cramic Way and under the bridge. The station also benefits from CCTV to improve security.

2.5.6 Port Talbot Parkway railway station offers national, regional and local services. A brief summary of the rail services available at Port Talbot Parkway is provided in Table 2.3.

Table 2.3: Port Talbot Rail services

Destination	Operator	Journey Time (mins)	Frequency (per hour)	First Train	Last Train
Swansea	Transport for Wales	31	4	06:21	02:07
Cardiff Central	Transport for Wales	46	4	04:05	22:57
Manchester Piccadilly	Transport for Wales	300	2	04:05	20:20
London Paddington	Great Western Railway	150	1	04:05	20:42
Carmarthen	Great Western Railway	80	2	06:21	00:25

2.5.7 This shows that the site is accessible by a range of public transport facilities, including regular train services provided throughout the day.

2.6 Proposed parking

Parking Policy

2.6.1 The parking standards for Neath Port Talbot are set out in the Neath Port Talbot CBC Local Development Plan (LDP) (2011-2026) Parking Standards, Supplementary Planning Guidance (SPG). A zonal approach to the standards is employed within the SPG with the site falling under Zone 4.

2.6.2 The parking standards for B1 uses are set out at Table 2.4.

Table 2.4: Use class B1 Zones 4-6 parking standards

Development	Requirement	Development	Requirement
Offices (<1000m ²)	1 space per 20m ²	Offices (>1000m ²)	1 space per 20m ²

2.6.3 Based on the proposed GFA of 3,688 sqm, in order to comply with the NPT parking standards, a total of 184 car parking spaces would be required at the development.

2.6.4 A 'reduction in parking requirement' calculation is set out in the Parking Standards SPG which allows a reduced level of parking provision, dependant on the number of sustainability points achievable by a development.

2.6.5 It has been calculated that the proposed development could achieve a sustainability score of seven and, therefore, a 20% reduction can be applied to the car parking requirement as per the 'reductions in parking requirement' table within the SPG.

2.6.6 Once the 20% reduction factor is applied to the parking requirement, the policy compliant level of car parking provision would be 147 car parking spaces.

2.6.7 However, the parking policy set out above reflects the requirements of an office. It is considered that the proposals for a data centre will result in a lower demand for parking for a given GFA as a large proportion of the building is taken up by servers. Therefore, the proposed parking provision has been calculated on a first principles basis, based on the likely number of staff employed within the data centre at any one time. This is set out in more detail below.

Proposed car parking

2.6.8 Given the specific use of a data centre the proposed parking provision has been based on a first principles approach, using the operators experience of the required staffing levels. It is likely that the proposed development will generate a total of approximately 88 staff on-site at any one time. Therefore, the bespoke approach for the development proposals is to provide a total of 93 car parking spaces within the site, which is likely to accommodate both staff and visitors to the site.

2.6.9 Based on 93 car parking spaces, five disabled parking spaces will be provided in line with NPT CBC parking standards. In addition, nine parking bays will be allocated as Electric Vehicle (EV) charging.

Proposed cycle parking

2.6.10 The NPT CBC cycle parking standards are set out within the Parking Standards SPG. The standards relating to B1 offices are set out at Table 2.5.

Table 2.5: B1 use cycle parking provision

Development	Requirement – Long Stay	Requirement – Short Stay
Offices	1 stand per 200m ²	1 stand per 1000m ²

2.6.11 Based on the current proposed GFA of 3,688sqm there would be a requirement for the provision of 18 long stay cycle parking spaces and four short stay spaces.

2.6.12 As part of the development, it is proposed to provide a total of approximately 32 safe and secure cycle parking spaces. These cycle parking spaces will be conveniently at the north of the site within the visitor car park.

2.7 Summary

2.7.1 As set out above it is considered that an appropriate level of car parking is provided on site based on the use of the development, staffing levels and access to public transport and active travel options.

3. Census travel to work data and vehicle distribution

3.1 Census travel to work data

3.1.1 2011 Census Travel to Work data within the QS701EW dataset has been reviewed to determine the forecast modal share of extant trips to work made by staff in the area of the

development proposals. The site lies within the boundary of Neath Port Talbot 019 middle-layer super output area (MSOA).

- 3.1.2 It should be noted that whilst 2021 Census 'method of travel to work' data is available, the Office for National Statistics (ONS) has issued a warning that care should be taken when interpreting the results. This is because 2011 census data was undertaken during the Covid-19 pandemic, when a large proportion of the population worked from home and people were discouraged from using public transport. It is more likely that 2011 census shows a more accurate representation of current travel to work data, and has, therefore, been used as part of this assessment.
- 3.1.3 Data from this MSOA has been used to inform the modal split and is shown in Table 3.1. This data excludes those that work from home and those not currently in employment.

Table 3.1: Neath Port Talbot 019 Baseline Census Data

Method of Travel to Work	MSOA – Neath Port Talbot 019 (%)
Driving a car or van	76
Passenger in a car or van	7
On foot	7
Bus, minibus or coach	3
Bicycle	2
Train	2
Motorcycle, scooter or moped	1
Total	100

- 3.1.4 The review of the 2011 Census method of travel to work data for Neath Port Talbot 019 indicates that driving is the most popular method of travel to work at 76%, with passenger in a car or van and walking comprising the two second most popular modal choices at 7%.
- 3.1.5 The data also shows that walking, cycling and public transport also contribute to up 14% of travel to work trips.

Place of residence and % travel to work by car

- 3.1.6 The percentage distribution of vehicles across the network has been based on 2011 Census data contained in QS701EW - 'location of usual residence and place of work by method of travel to work.' The driving a car or van dataset has been selected as the method of travel.
- 3.1.7 The 2011 census to work data has been used to identify the location of usual residence and the percentage of staff travelling to work by car, and summarised in Table 3.2.

Table 3.2: % of staff travelling to work by car

Place of residence	% of staff travelling to work by car
Neath Port Talbot O16	5
Neath Port Talbot O17	5
Neath Port Talbot O18	5
Neath Port Talbot O19 (Margam)	5
Neath	6
Baglan	5
Cymafan	5
Briton Ferry	2
Pontardawe	2
Cardiff	15
Bridgend	17
Swansea	19

3.1.8 Table 3.2 shows that 20% of staff travelling to work by car are travelling from Port Talbot town, this could be reduced by using more sustainable modes of travel.

3.2 Vehicle distribution and assignment

Provisional targets

3.2.1 The measures the development seeks to implement are designed to affect a modal shift away from the use of single occupancy vehicles used by staff of the site.

3.2.2 As set out in the Travel Plan submitted as part of this application, the primary objectives will be to reduce car driver trips (single occupancy vehicles (SOV)) by 8% of the overall modal share within a five-year period, with a corresponding 8% increase in the use of other sustainable modes.

4. Framework travel plan measures

4.1 Overview

4.1.1 This section of the Sustainability Report provides a summary of the Travel Plan submitted as part of the planning application, which sets out a wide range of measures and actions which will be implemented to encourage walking, cycling and public transport use in accordance with national and local policies.

4.2 Measures to promote sustainable transport and travel

4.2.1 It is essential that the design incorporates good quality, safe and comfortable walking and cycling routes, and that the layout is 'permeable' to those on foot or bicycle.

4.2.2 Travel initiatives used to encourage journeys by non-car modes must be suitable for review and monitoring and need to be practicable for implementation by those involved.

Travel Information Board

4.2.3 A Travel Information Board will be provided in communal areas of the building.

4.2.4 The boards will promote travel by alternative modes of transport and display the following information:

- » Details of pedestrian and cycle routes in the local area;
- » Details of NPTC's cycle routes and super highways:
https://www.npt.gov.uk/media/5401/neath_port_talbot_cycle_map.pdf?v=20180717181057
- » Information on public transport apps such as First Bus and National Rail;
- » Local bus and rail service details including relevant maps and timetables;
- » Information regarding general pedestrian and cycle safety;
- » Promotion of national travel events such as Cycle to Work Day (www.cycletoworkday.org) and 'Bike Week' (www.bikeweek.org.uk).

4.2.5 The travel information boards will provide a point of reference for all staff in respects of the TP and identify the commitment to the TP. The board will be used for information, relevant travel promotion and advertising.

Travel Information Pack (TIP)

4.2.6 A Travel Information Pack (TIP) will be produced and provided to all staff to outline the benefits of sustainable travel i.e., health and the environment.

4.2.7 This Travel Pack will include the following information, with illustrated route maps for the relevant public transportation information:

- » Timetables and route maps for public transport. This should include isochrone maps showing schedules journey times and timetable information;
- » Cycling and walking maps for the local area and the contact details of local and national cycling organisations, such as Sustrans;
- » Details for any community travel sites and community forum sites.

Walking

4.2.8 Evidence shows that people who are physically active in their daily lives are more productive and take less time off sick. The C3 Collaborating for Health 'Choosing Health: Making healthy choices easier' (2012) document, recognised the health benefits of walking and / or cycling. Active travel as part of a Travel Plan enables people to enjoy these health benefits as part of their daily routine as well as reducing environmental impacts and saving money.

4.2.9 Walking advice and local pedestrian routes will be provided within the TIP and on the travel information board.

Cycling

4.2.10 Cycling information and guidance will be contained within the TIP and on the travel information board to support and encourage cycling. National cycle events will be promoted through the travel information board.

4.2.11 The level of cycle parking for staff provided and its utilisation will be closely monitored by the TPC with additional cycle parking made available if demand dictates.

Promotion of public transport use

4.2.12 TIP's and noticeboards will include promotional material covering public transport options for staff. This will include the promotion of the following apps and websites which provide access to network maps and timetable information:

- » First Bus <https://www.firstbus.co.uk/south-west-wales>
- » National Rail Enquiries <http://www.nationalrail.co.uk/>

4.2.13 Information would also be provided within the TIP and on notice boards relating to nearby bus stops, the routes served and timetable of services.

Promotion of local and national travel events

4.2.14 The TPC will promote local and national cycle events such 'Car Free Day' and 'Walk to Work Week' on the travel notice boards and within the travel information packs.

5. Summary and conclusions

5.1 Summary

5.1.1 This Sustainability Report has been produced following the highway comments raised in regards to the proposed mixed-use development at Harbourside, Port Talbot, which will be known as the South Wales Industrial Transition from Carbon Hub (SWITCH). The comments highlighted that a robust Sustainability Report is required to justify the proposed car parking provision.

5.1.2 As set out throughout this report, the site is situated in a sustainable location, with a network of high-quality walking and cycling routes which already accommodate significant levels of pedestrian and cyclist movements.

5.2 Connectivity

5.2.1 The site benefits from a range of local facilities and amenities within close proximity of the proposed development, including frequent bus and rail services within walking distance of the site, which provide access to a variety of key local, regional and national destinations. These provide an alternative to travelling to the site by car.

5.2.2 The range and choice of travel options within the vicinity of the site, therefore, offer a realistic and alternative to the car for travel to and from the site. The accessible location will encourage and promote sustainable travel behaviour and would attract staff who would prefer to travel by modes other than the private car.

5.3 Car and cycle parking

5.3.1 It is anticipated that the proposed development is likely to generate approximately 88 staff onsite at any one time. As part of the development, it is proposed to provide a total of 93 car parking spaces onsite, including 9 EV charging points and 5 accessible bays.

5.3.2 Furthermore, it is proposed to provide a total of approximately 32 cycle parking spaces onsite, in accordance with the NPT cycle parking standards. These will be conveniently at the north of the site beside the substation and at the visitor car park.

5.3.3 The proposed parking levels show there is an appropriate level of car parking based on the use of the development, staffing levels and site location. The development will benefit from access to a range of public transport and active travel options which will further promote options to promote sustainable travel within this location.

5.4 Census travel to work data

5.4.1 The review of the 2011 Census method of travel to work data indicates that driving is the most popular method of travel to work (76%), with passenger in a car or van and walking comprising the two second most popular modal choices (7%).

5.4.2 Census travel to work data shows that that 20% of staff are travelling from their residence in Port Talbot, which could be reduced by staff using sustainable modes of travel.

5.5 Mitigation measures

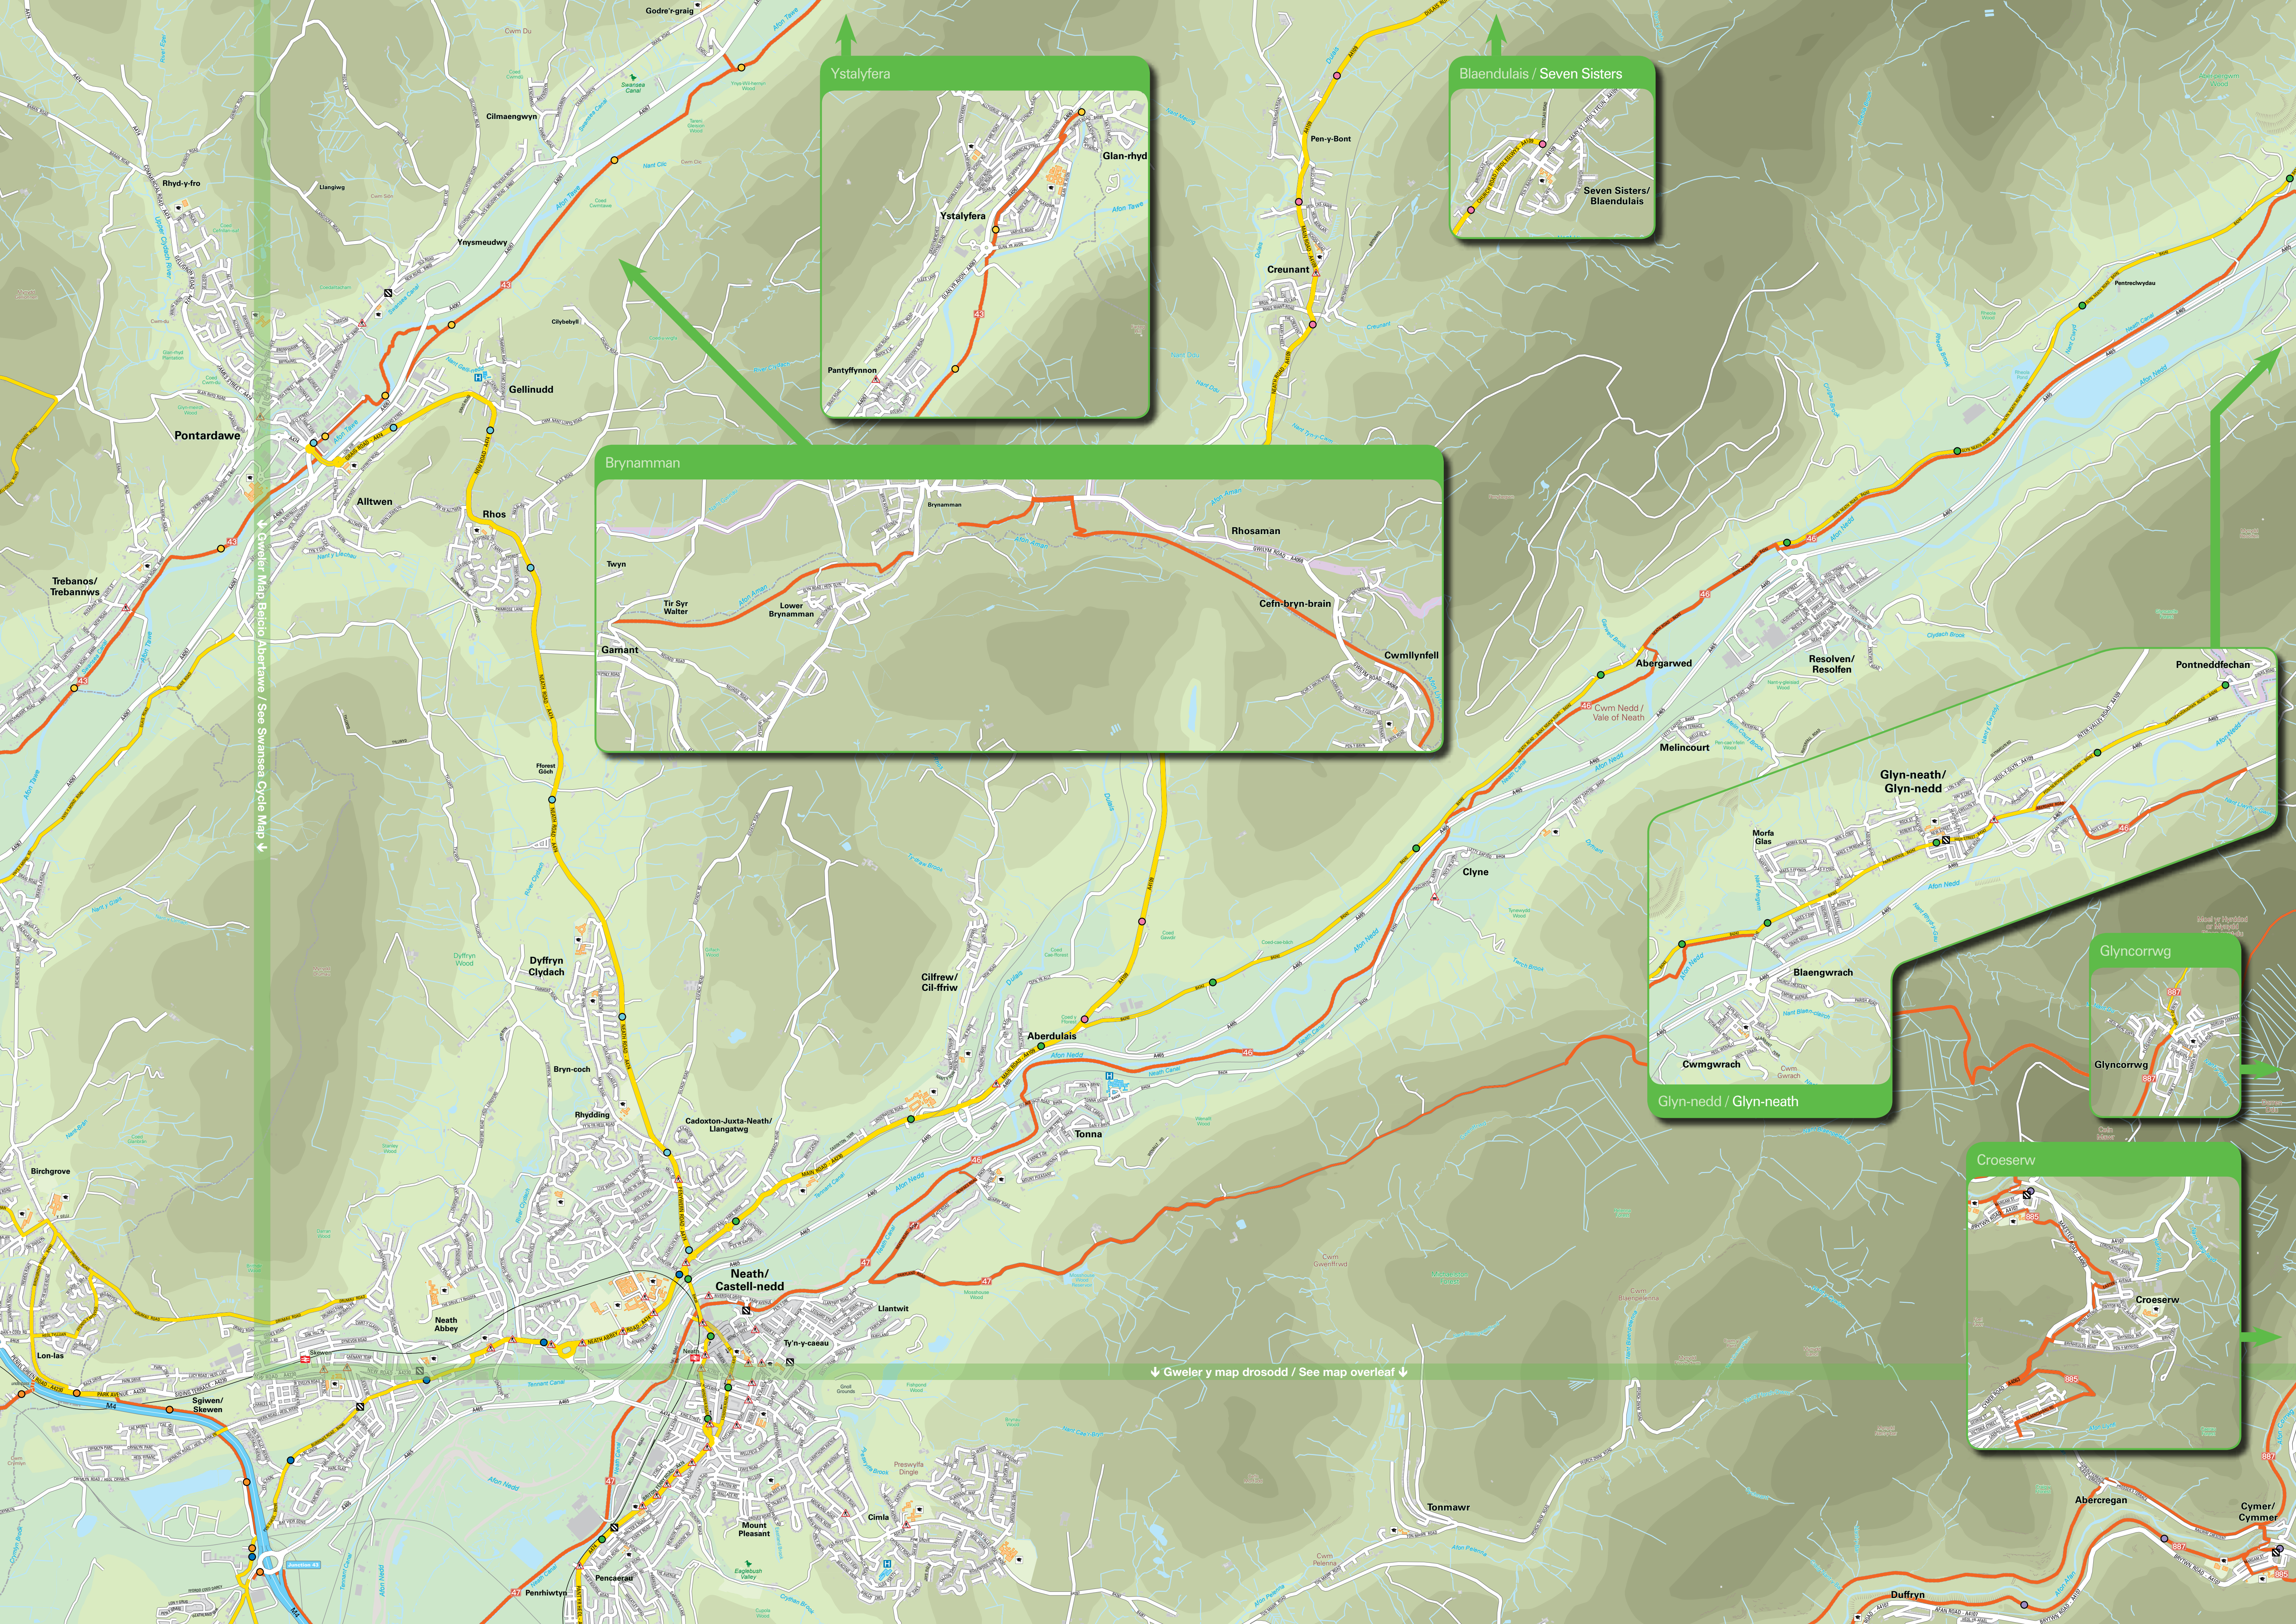

5.5.1 As submitted as part of the planning application, a Travel Plan will be implemented on initial occupation of the development. This will focus of raising awareness and providing incentives to promote sustainable travel, such as travel information board, TIP distributed to every staff, secure cycle parking, promotion of public transport availability and promote local and national cycle events such 'Car Free Day' and 'Walk to Work Week'.

5.5.2 The development will benefit from a range of measures and actions to maximise the accessibility of the site and offer viable sustainable travel choices.

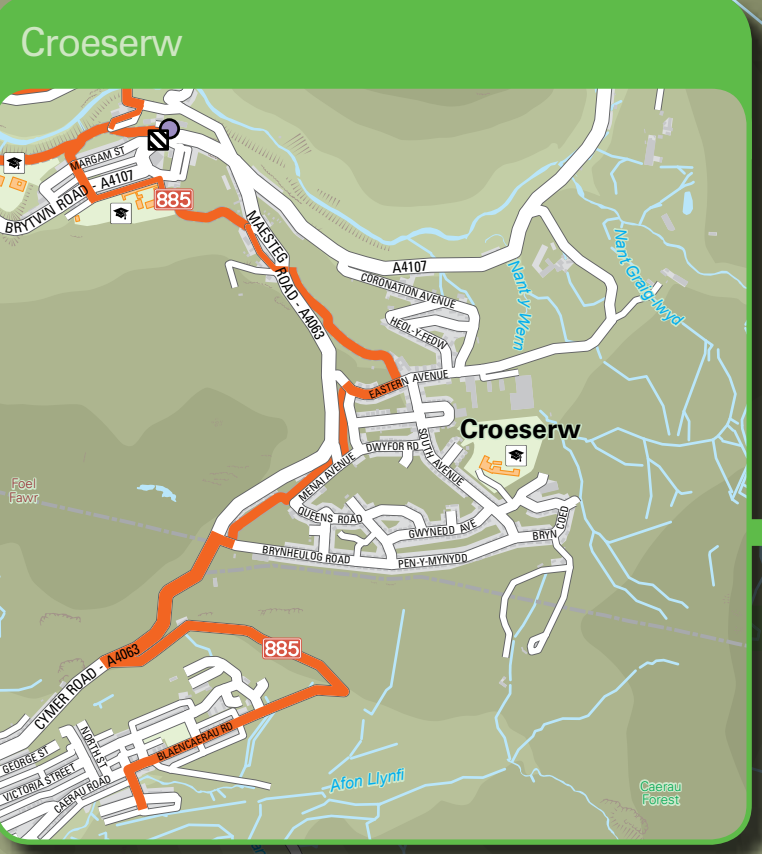

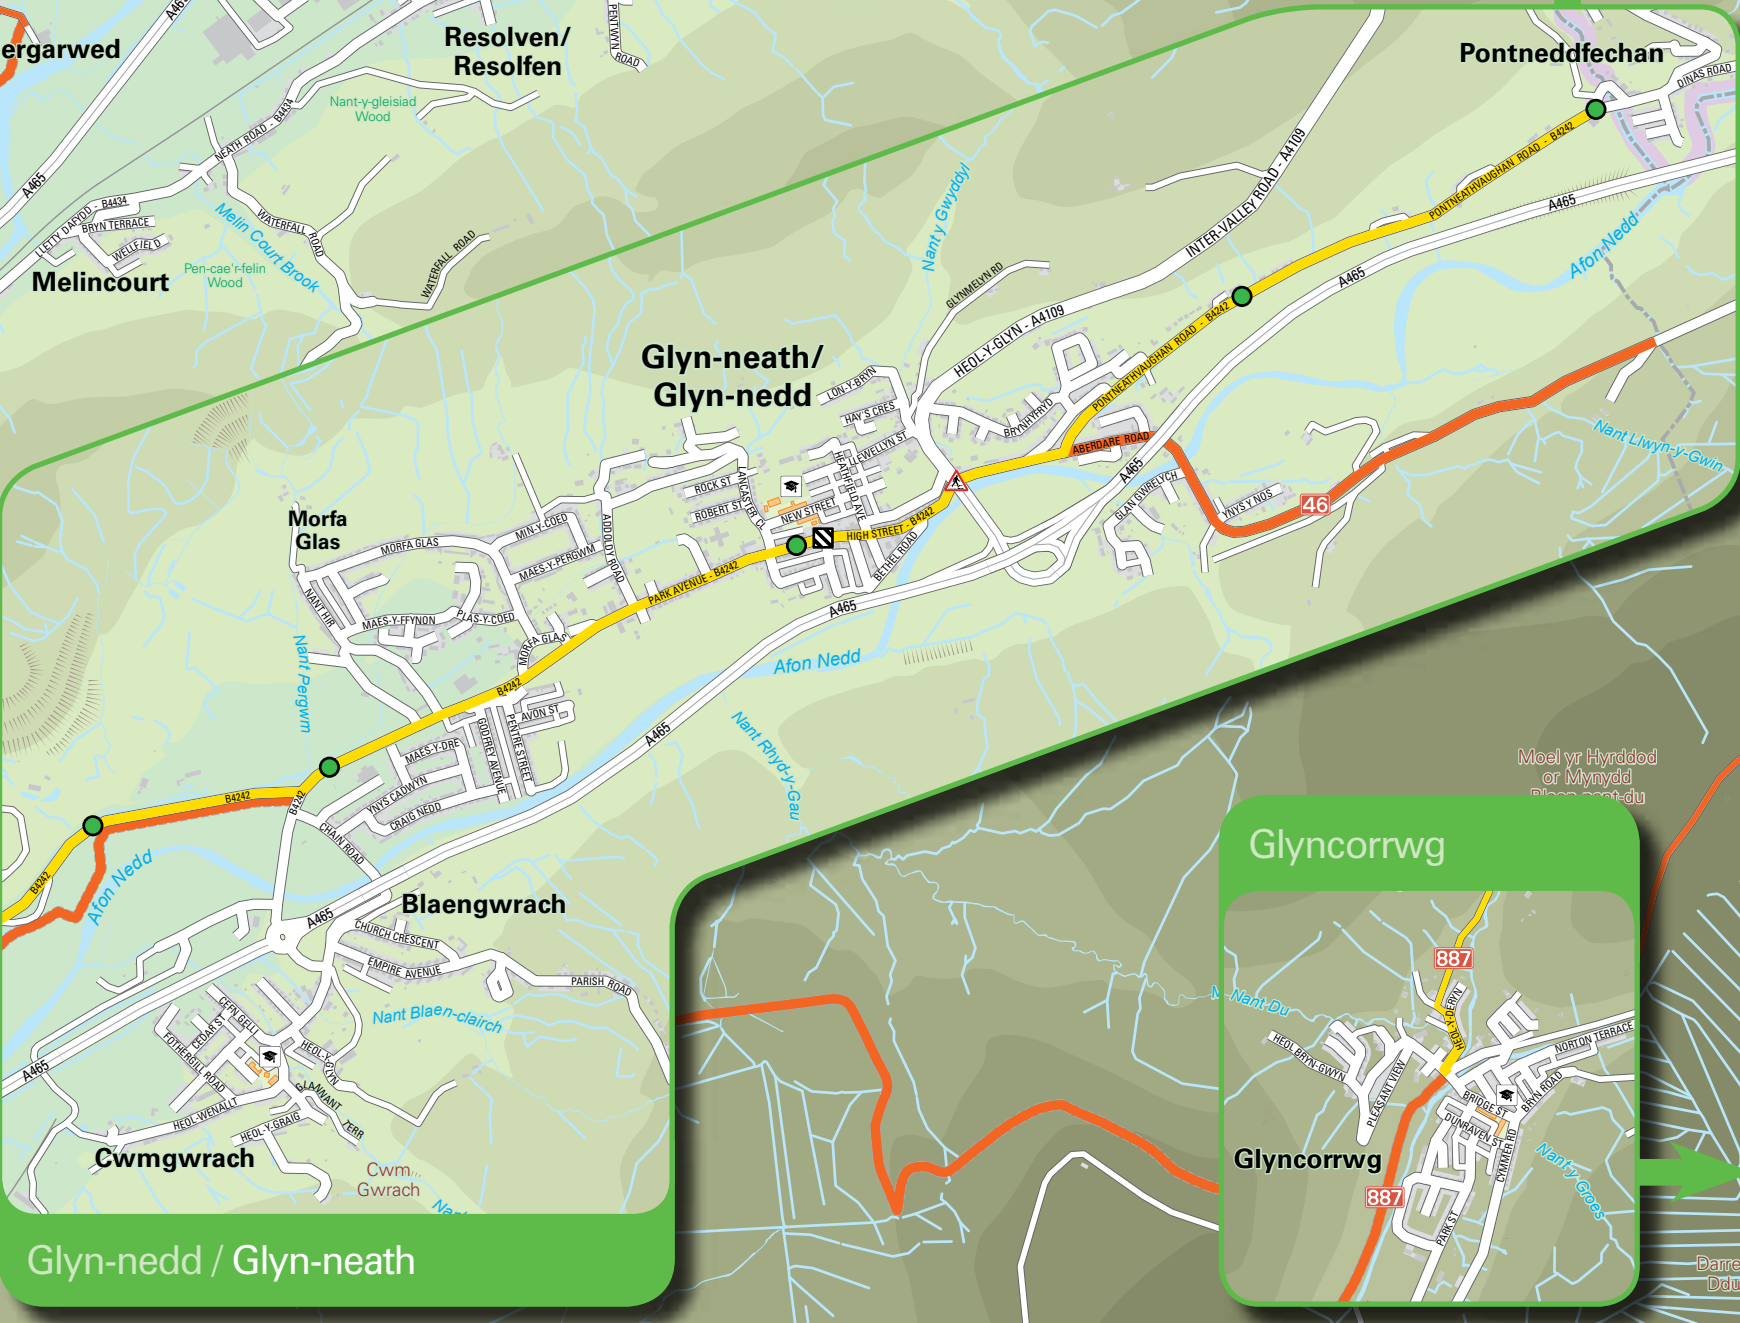

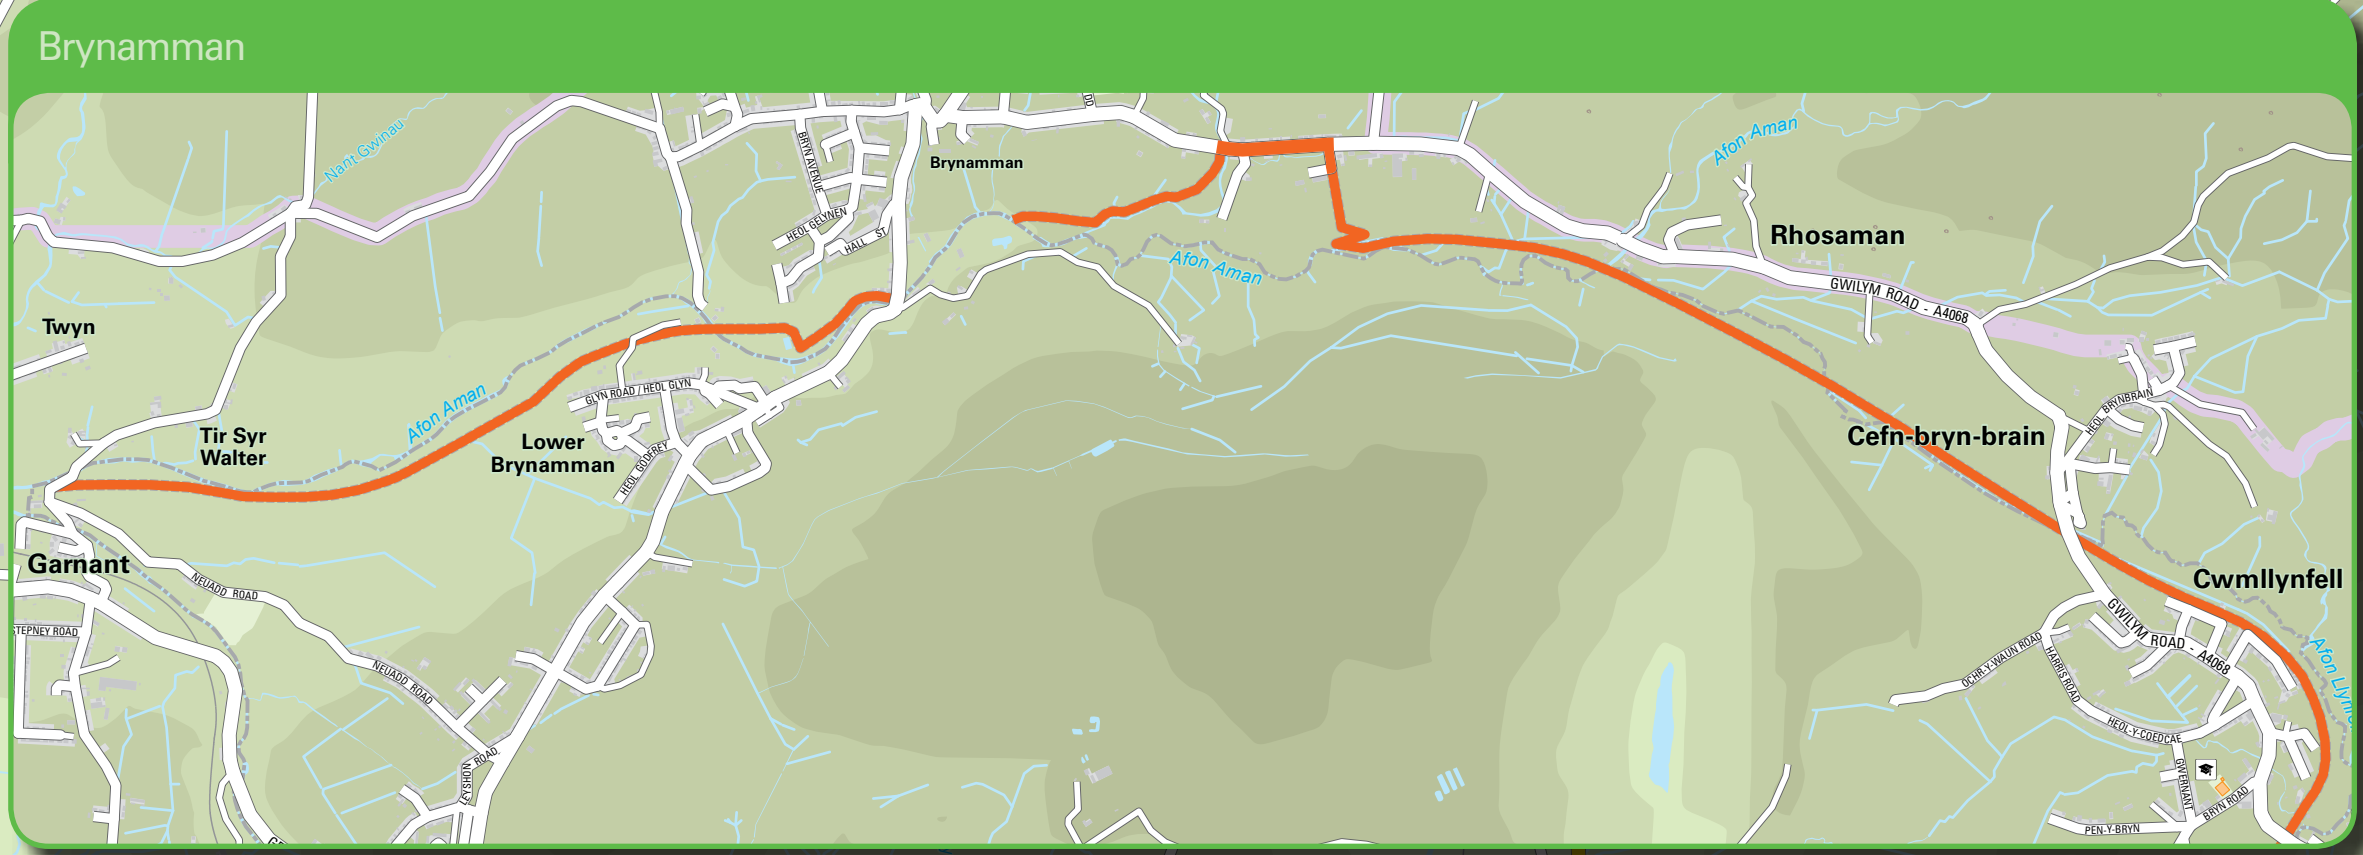

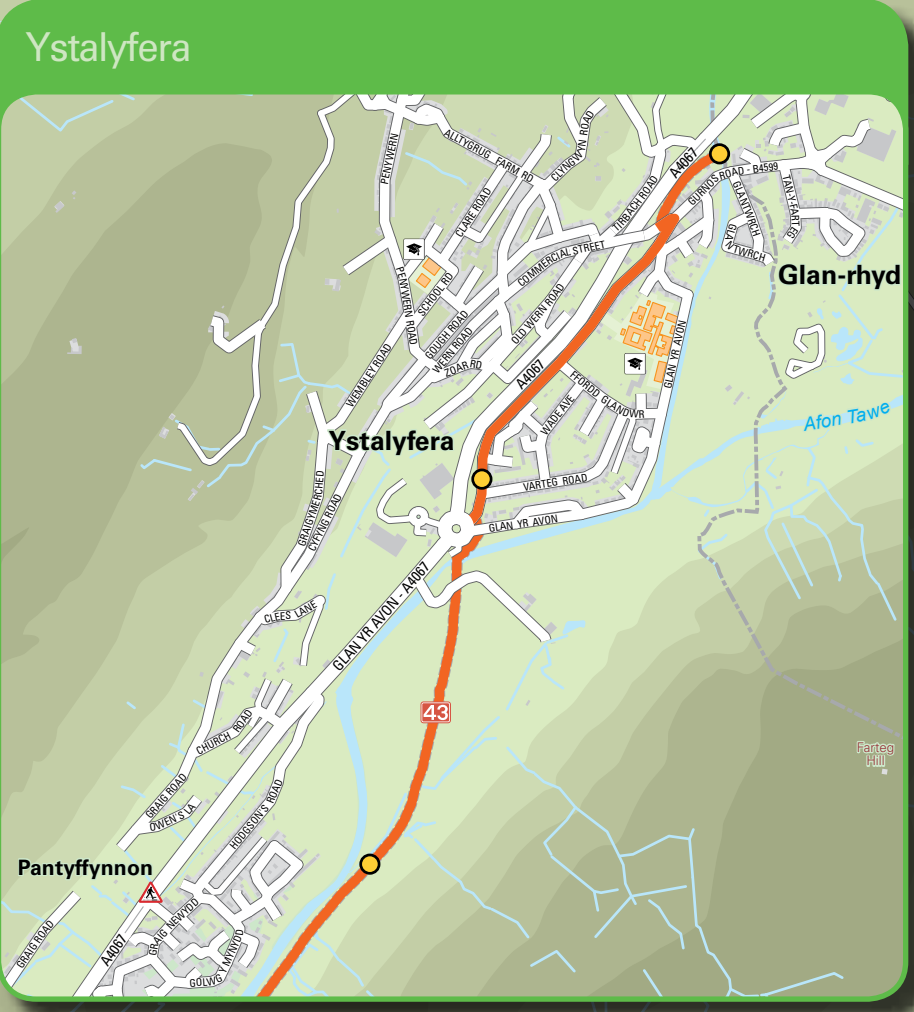

5.6 Conclusions

5.6.1 It is considered that the proposed level of car parking is sufficient to accommodate the likely parking demand generated by staff travelling to the site, together with promoting the use of sustainable travel in accordance with local and national policy. It is not considered that the proposed development will have a significant impact on the surrounding highway network.
